## City of Costa Mesa 5-Year Financial Plan

## Pension Oversight Committee Meeting January 13, 2016

A new financial plan model has been developed to focus on the City's general fund. It begins with account level detail, and incorporates both percentage increase factors based on economic forecasts and historical trend data and the ability to add absolute dollar amounts where needed. This feature makes it possible to plan steps up or down from projected trends and add or delete one-time items. Two levels of summary data are also provided.

The financial plan process started approximately one year ago in meetings with each department head for input specific to their department and programs. In addition, the CEO provided a corporate perspective on the next five years. More recently, work continued with reviewing economic forecasts; using CalPERS pension cost rate forecasts; and analyzing the City's historical revenue and spending trends based on eleven years of data through FY 14-15 actuals, as well as the FY 15-16 adopted budget amounts.

## Revenues

The projection for each revenue account is generally based on its own base level or historical growth pattern:

- Property Tax is projected at a 3 percent annual growth rate plus the impact of the recently annexed Santa Ana/Colleen area and the additional property tax generated by 29 planned new development projects over the next three years.
- Sales Tax is based on HdL (the City's sales tax monitoring consultant) projections including the end of the State's triple flip program. Sales tax is projected at a 3.7 percent growth rate tapering off to 2.8 percent by FY 20-21.
- Transient Occupancy Tax revenue is projected at a 3.5 percent annual growth rate. (The tax rate is projected to remain the same.)
- Building \& electrical permits reflect a historical cycle that suggests they begin declining slightly in FY 17-18.
- Development Services and Parks \& Community Services provided input on revenues associated with their service and program activity levels.
- Costa Mesa Country Club golf course fees are assumed to remain the same.

The results of the revenue forecast is that general fund revenues would be $\$ 129,509,138$ by FY 20-21.

## Employee Costs

Regular salaries are projected in three major categories: sworn Fire, sworn Police and non-sworn Miscellaneous (general) employees. These categories reflect the three primary bargaining groups, and facilitates the separate calculation of pension costs for each group. The current budgeted vacancy factor of 4 percent is used in all five years. For forecasting purposes only, some inflationary growth on salaries is forecasted for all groups. Position growth is held to one new full-time position per year. Part-time costs are forecasted to gradually decline as regular positions are filled. The impact of a possible $\$ 1$ per hour minimum wage increase each year is also included. Overtime is held at current levels (but could decline as vacant positions are filled). Pension costs are based on rates forecasted by CalPERS with the rates leveling off in year five. Pension costs also include the continuation of an annual additional $\$ 500,000$ payment. Other employee costs are based on historical trends, or grow at the same rate as salaries in the case of smaller accounts.

It should be noted that CalPERS recently implemented their "Funding Risk and Risk Mitigation" strategy. Part of this strategy involves the use of greater than expected returns in a given year to help stabilize employer rates and reduce the discount rate over time from 7.5 percent to 6.5 percent. As stated in a previous CalPERS presentation, "There is a cost to reduce risk." This could take the form of increased employer normal cost rates by up to 1.82 percent of payroll for the miscellaneous plan, and up to 3.20 percent of payroll for the safety plans. With this plan in place, rates could be affected as early as FY 18-19. This cost is included in the forecast of pension costs.

## Debt

In FY 18-19 the final payment on the 2003 Certificates of Participation will be made, which will result in $\$ 1,259,272$ available for other purposes. A separate Library Funding Options report recommends these funds be dedicated to the Library/NCC/Park project which is now in the planning stages. Therefore, debt principal and interest costs continue at similar levels beyond FY 18-19.

Pension debt as reported in the most recent CalPERS annual valuation reports (June 30,2014 ) is $\$ 215,667,950$. The City currently is paying this over a 30 -year amortization period plus making additional annual payments of $\$ 500,000$ plus $\$ 241,000$ from the annual prepayment savings. Additional funding sources that would enable the City to pay down this debt faster could include increased employee contributions including safety employees, increased transient occupancy tax, Fire or other service fees.

## Contingency

The contingency account is held level at $\$ 1,000,000$ annually.

## Reserves

Reserves as reported in the February 2015 reserves study were $\$ 42,770,222$. According to the reserves policy, annual additions of up to $\$ 1,500,000$ would be made based on the existence of a sufficient surplus at the end of each fiscal year. This plan indicates that reserves would remain at current levels for the entire five-year period.

## Conclusion

The five-year plan provides the City with an extended planning horizon and a basis for dialogue and planning. The plan reveals two key issues for the next five years. First, there are no large amounts of funding for new initiatives without replacing current services, waiting for existing debt to be paid off or issuing new debt. Second, with modest revenue growth from a good, stable economy, the City can continue current operations at budgeted service levels, pay for projected pension costs, pay for current debt obligations, continue to dedicate 6.5 percent of general fund revenues to capital improvements and capital facilities projects, and maintain current levels of reserves. Small revenue-to-expense deficits are forecasted in all five years and will be dealt with during the annual budget process.
